APPLICATION GUIDELINES

- Proper application rates and frequency should be determined by specific conditions and plant requirements.
- Improved irrigation efficiency is required.
- Always jar test before adding to a spray tank or injection tank.
- Spray and fertigation applications should be made with sufficient water, 50 mesh screens and agitation throughout application.
- Do not spray on highly sensitive plant material at a rate of more than 0.5% by weight.
- When tank mixing with other chemicals, it is the responsibility of the end-user to assure compatibility & safety.
- Poly in-line filters should be replaced with stainless steel, if possible.
- Always consult your agronomist.

AVOID CONTACT WITH SKIN, EYES OR CLOTHING. In case of contact immediately flush skin, eyes or clothing with plenty of water for several minutes.

WARRANTY: Since weather, crops, soils and other ecological conditions may vary, the seller makes no warranty of any kind, express or implied concerning the use of this product. The user assumes all risk of use and handling whether or not in accordance with directions or suggestions.
